MEPCO Offers New Line of Float and Thermostatic Repair Kits

For Immediate Release – February 21, 2012

Grand Rapids, MI – MEPCO announces we have added a new line of repair kits for all major float and thermostatic manufacturers. If you attended the 2012 ASHRAE show in Chicago and stopped by our booth, you saw our new cut sheet and some of the new products on display.

You can now get repair kits for most makes and models that need servicing. Our kits allow for easy replacement without costly re-piping typically associated with replacing float and thermostatic traps.

The new cut sheet is currently available on our website. You can place your orders immediately. As always, if you have any questions, please contact customer service.
